1º Semestre de 2026

Teste e Qualidade de Software JCRTQSW

Prof. Lineu Mialaret

Aula 24: Projeto Piloto para Testes

Projeto Piloto (Temática Central)

- Desenvolver um Sistema de Software com *Framework* Web, utilizando Tecnologia de Banco de Dados, empregando o Método Ágil Scrum e fazendo gerenciamento de configuração.
- Aproveitar projetos de outras disciplinas.
- Requisito Técnico do Projeto Piloto:
 - Implementar os 4 níveis de testes que vêm sendo estudados.
 - Para cada nível de teste, apresentar o Plano de Teste equivalente.

Níveis de Teste

LEVELS Of Software Testing

01

Unit Testing

- Unit testing is the process of testing individual units.
- Developers perform unit testing.
- The focus is on whether each unit performs according to its specifications.

02

Integration Testing

- Integration testing is the process of testing interconnected units.
- Developers and testers perform integration testing.
- The focus is on the interaction between the units of the software.

03

System Testing

- System testing is the process of testing the software as a whole.
- Developers and testers perform system testing.
- The focus is to check if the output was able to meet the goals.

04

Acceptance Testing

- Acceptance testing is the process of testing for acceptability.
- Customers and end-users perform acceptance testing.
- The focus is to check if the software meets and satisfies the client's requirements.

Importance of the Levels of Software Testing

Each level of software testing ensures the final product will perform as expected.

Teste de Unidade

- Para o Teste de Unidade:
 - Usar 2 ferramentas de Teste de Unidade.
 - Usar 2 técnicas de Teste Funcional.
 - ❖ Classes de Equivalência.
 - ❖ Valor Limite.
 - ❖ ...
 - Usar 2 técnicas de Teste Estrutural.
 - ❖ Teste de Caminhos (ramificação e condição).
 - ❖ Técnica de Fluxo de Dados.
 - ❖ ...
 - Usar Teste de Mutantes.

Níveis de Teste (cont.)

LEVELS Of Software Testing

01

Unit Testing

- Unit testing is the process of testing individual units.
- Developers perform unit testing.
- The focus is on whether each unit performs according to its specifications.

02

Integration Testing

- Integration testing is the process of testing interconnected units.
- Developers and testers perform integration testing.
- The focus is on the interaction between the units of the software.

03

System Testing

- System testing is the process of testing the software as a whole.
- Developers and testers perform system testing.
- The focus is to check if the output was able to meet the goals.

04

Acceptance Testing

- Acceptance testing is the process of testing for acceptability.
- Customers and end-users perform acceptance testing.
- The focus is to check if the software meets and satisfies the client's requirements.

Importance of the Levels of Software Testing

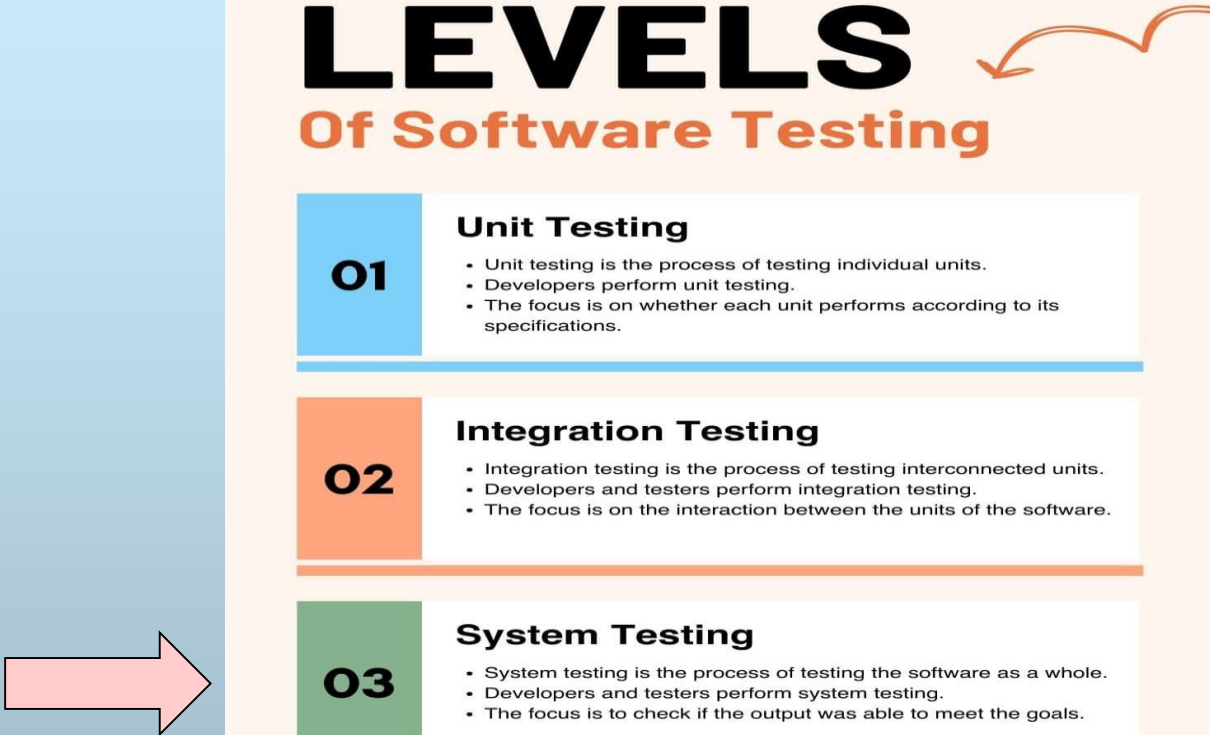

Each level of software testing ensures the final product will perform as expected.

Teste de Integração

- Para o Teste de Integração:
 - Usar 2 ferramentas de Teste de Integração.
 - Usar 2 estratégias de Teste de Integração.
 - ❖ Top-down.
 - ❖ Bottom-up.

Each level of software testing ensures the final product will perform as expected.

Teste de Integração

- Para o Teste de Sistema:
 - Usar 2 ferramentas de Teste de Desempenho.
 - ❖ Jmeter
 - ❖ ...
 - Usar 5 tipos de Teste de Desempenho.
 - ❖ Teste de Carga.
 - ❖ Teste de Estresse.
 - ❖ Teste de Capacidade.
 - ❖ Teste de Resistência.
 - ❖ Teste de Volume.
